Carreer targets

Right now:

A job where i participate in a team of 5 to 20 people on a single projekt at a time, where there's time enough to get the job done right.

A job which isn't about servicing and maintaining the same project year after year, but instead a job where each project lasts for 6-12 months and there after moves on to the next exciting project.

In the future (2-4 years ahead maybe):

projectleader or architect, because i see my self as a good leader.

Professional experience

Total experience: 6-10 years

Compusystem a/s

Period: 21-01-2008 until today (~5,5 years)
Job title: Developer / Project Manager / Hardware Manager
Technologies: .Net / ASP.Net (C#, VB, J#, ADO, VS) Frontend (CSS, HTML, XHTML, Javascript) Microsoft Dynamics AX / NAV (Axapta, Financials, etc.) SQL Visual Studio
Description: **Through the past 5 years** i've had the main responsibility for the development and maintenance of a web-catalog which is used daily by 2000+ users. The catalog is build in Silverlight, ASP.NET, MS SQL, HTML/JS and integrates to XAL, Navision and Octopus (COBOL system). Today im the only one on the project and is continuing development and maintenance.

In 2011/2012 I started on a project to develop a video-education site, which educates people in banking, local-government in becoming better at Microsoft Office, Windows and various other office programs. My job was to transfer the functionality of an old portal-site to a new one, build from scratch with ease in mind. A big goal was to make it easy to administrate and easy to upload new videos, a task i managed to fulfill. The site is today a success and is used throughout the country in municipalities, banks and so.

In 2009-2011 I had various tasks, setting up new stores for a famous danish bakery, the tasks included installation of new PC's, integration with Dynamics AX, development on a backend portal, various service tasks.
